Nothing but something really special

by Simone Leo

Psyasic's father is the famous * Psytadel, an international mix of blood lines. Its grandfather, Padron, a Tersk stallion out of Aswan x Podruga from Priboj, and Odessa NSB, of the Crabbet line, produced 42 USA National winners, a number that places it right among the top breeders. Its father, Padron Psyche has Kilika in its maternal line, and is a Tersk breeding product of the stallion * Tamerlano (Arax x Ptrapacia out of Ponomarets), which makes * Psytadel a stallion with 3/4 russian bloodline. Assuan (out of Nazir) brings in the Egyptian line.

*Psytadel's mother is Bint Bey Shah (Bey Shah x Musk Angel Eyes).

Certainly it is not necessary to introduce Bey Shah, as its name has made history in the Pure Bred Arabian breeding, so much so it was defined "the best money machine ever seen on Earth" and with very good reason. Its stud fee, given its age, has reached figures beyond any imagination, but its progeny is well worth it, counting as it does 22 USA National Champions, plus many more, the number is even more significant, which are related to it. Psyasic's maternal bloodline, through Karoba - which was Fillies European Champion in 1994 - goes back to * Kubinec, which constituted a true revolution since its debut, becoming first German National Champion, then European and finally World Champion. Psyasic has displayed its excellent aptitude right from the beginning. As a colt in 2006, it was Reserve Junior Champion Colt in Strohen, Germany, then Reserve Junior Champion Colt in Abu Dhabi (UAE) and top ten at the World Championships in Paris. Certainly its list of victories is long, continuing up to today, with the title of Champion and awarding

.Psyasic

of the Gold Medal in Class A in Verona during 2014. Psyasic's peculiarity however is not so much in its many wins, as in its character, its aptitude, its intelligence and, last but certainly not least, its capacity as a breeder. Psyasic had Marajj as stable mate; it was difficult to compete with a "neighbour" so competitive (and so splendid) in number of coverings, and in fact it did not have too many as a young stallion, but those were surely quite significant: HG Sweet Fantasy (owner: Sweet Fantasy Partnership) was surely one of them. Its story as a breeder nevertheless took a radical turn in 2010, when it was first leased and then, in 2012, purchased outright by Scuderia Groane (Italy) that started to "try" it on its own mares. Right away its remarkable type stood out and, rather extraordinarily, both in fillies and colts. It managed such prodigious feats even with mares that with several well proven stallions had produced absolutely normal, if at times not poor, specimen. Not with Psyasic, they didn't! Its sons or daughters can be immediately recognized from their common features: balanced character, correct limbs and physique, huge expressive eyes, pronounced stop and good movement.

Given such results, it was obvious that the leasing contract should be converted to outright sale and so Psyasic acquired its Italian passport. It has taken part in several shows, always taking home a medal, and between 2010 and 2011- in five shows – harvested two Champion titles, two reserve Champion, one Bronze and a Best Head prize. Brought back again to shows, after a well deserved break, it obtained the Silver Me-

SG Valentina

dal at the Italian National Championships finally winning the Gold Medal in Class A in Verona in 2014 but, even more interesting, its progeny started to clean up show prizes already as futurity. SG Wera, Champion Futurity Filly in Travagliato, SG Wendetta (x SG Wenusia), which obtained the Gold Medal in Berzo at its first ever show, a Top Five at the European Championship in Verona in the Yearling Fillies category in 2013 and the Gold Medal at the B international of Chazey Sur Ain (FR). Walking through the stables and watching in the boxes today we find Wendetta, by Psyrasic, that we remember as a wonderful filly and today is an incredible mare who has already proved her quality as a mare.

And also SG Valentina (its full sister but a year younger), which between 2013 and 2014 collected 4 Gold medals, one of which in Verona Classe A and a Silver Medal in addition to the title of Italian Champion. And then SG Lotus (x Wanity), which in five competitions racked up three Gold medals and recently a Silver one at the Travagliato Class B International 2015. The list continues with Matrix Di Mar (x Principessa Di Mar), which on her palmarés displays 4 medals, the last one being the Gold medal obtained in Class A in Verona 2014; Nabil Di Mar, which obtained the unanimous Title of Champion Futurity Colts in Cavallgrigna; SG Legolas, Champion Bronze Medal at Arabitalia in Verona during 2014; the young Ojala Di Mar unanimous Champion Futurity Fillies at the Travagliato B International. Navardi Mar (by Isabeau Di Mar) that was Gold Medal Ch. Colt in Montefalco and was also nominated Bronze Medal in Chantilly, SG Pegasus (Psyrasic x SG Walkiria) was Gold Champion Futurity Male in Milan. Yet many other are the subjects worthy of men-

Mazaya Domitia

tion coming out of this Stud, such as the splendid HG Sweet Fantasy (by Zawaleen, owned by the Sweet Fantasy Partnership), the beautiful Mazaya Domitia (by the World Champion Mare Ul Sid Parma, bred by the Allmann Family), which we should soon see competing in the Yearling Fillies category, Mashaal Albidayer (by Mattharii) a multiple Champion owned by the Albidayer Stud (UAE), and yet a seemingly endless list of very promising subjects that have already been born and we shall soon see in the most important competitions, and doubtlessly just as many yet to be born, whose arrival we look forward to with joy.

Everybody can see that the foals of Psyasic are not just beautiful when they are newborns but also later when they grow up as a promising stallion or a wonderful mare.

The open pedigree of Psyasic can work with all the lines and the confirmation of that topic is the semen of Psyasic was exported throughout the Europe.

Many breeders in Europe took the chance to buy a foal from Psyasic and as a matter of fact today we are finding foals in Denmark, France, Germany and so on.

The huge dark eyes that Psyasic has are visible in all the progeny as well as his perfect movement and solid body.

Since last year many breeders from America and Brazil have been admiring the progeny of Psyasic and Cristina and Marco Franchini are happy to announce that, starting from the end of 2016 the Psyasic semen will be available for Noth and South America through CER Clinic Center in Brazil.

Mashaal Albidayer

The frozen semen of Psyasic passed all the tests and the quality is excellent.

The representative of the semen in Brazil and South America will be Zico Guardia in collaboration with Simone Leo who knows Brazil and the Brazilian market very well, and he is sure that Psyasic will do an excellent job there.

The next project is sending the semen of Psyasic in the Middle East and participate with many foals in the Arabian Futurity of Aachen in 2017.

We can just continue giving you more news and information, but in our opinion coming and visiting Scuderia Groane and seeing with your eyes how Psyasic can pass his qualities to all the progeny is the best choice you can do.

There is one more final aspect however that makes Psyasic really special and that is its nature and character. The balance it displays is superlative. Even at the acme of the mounting season one can open its box and saddle it for a ride. It can be as performing in the ring as it is peaceful as soon as the show is over. Psyasic is one of those rare and special horses that get into your heart and never come out again.
