

# THE GENETIC POWER OF HARAS JM'S MARES

ARABIAN HORSES: ELEGANCE, ENDURANCE AND  
EXCELLENCE THAT CAPTIVATE THE WORLD

◆ by Marisa Rogerio - photos by Alessio Azzali, Judith, Tupa ◆

In the universe of horse breeding, few races are able to unite as much beauty, functionality and tradition as pure Arabian horse. With bloodlines tracing back thousands of years, these horses—shaped by nature and refined by human hands—exhibit a unique blend of traits that continue to enchant horse lovers worldwide.

Arabian horses are renowned for their unmatched endurance, sharp intelligence, gentle temperament, and striking beauty that exceeds all standards of equine aesthetics. They truly embody art in motion!

At the core of this living heritage are the Arabian mares. Haras JM focuses on these mares to develop its breeding program, striving for international recognition for the high quality and genetic strength of its Arabian mares.

## 35 Years of the Haras JM Breeding Program

Over the past 35 years, Haras JM has established an impressive foundation: a herd of 375 Arabian mares, ranging from promising young fillies to proven matriarchs. Of these, 240 were born and raised at the farm, while 135 were carefully selected from top breeders in Brazil and the United States.

These 375 mares form the cornerstone of Haras JM's breeding

program. They are not only the foundation of its legacy, but also the guardians of the farm's most valuable asset: its genetic strength.

More than just high-quality broodmares, these mares represent the result of meticulous work—a blend of sensitivity, foresight, and strategic vision. Every selection, whether for breeding or acquisition, follows a deliberate process. The

goal has always been clear: to bring the finest bloodlines and individuals into the program, keeping pace with the evolving standards of the Arabian horse. In the last decade alone, the Arabian has undergone notable refinements in phenotype, attitude, and movement—changes that demand equally dynamic approaches to selection.

Every mare at Haras JM is evaluated

Stig Justhine (WH Justice x Mag Shall Londrina by Magnum Chall HVP) - Born in 2010

with precision, not only for her morphology and pedigree but also for her alignment with modern breed ideals. The team draws inspiration from the most successful show horses around the world, ensuring the program remains at the forefront of global standards.

Creating a herd that truly stands out means looking beyond individual beauty. Most mares in the program

carry pedigrees that feature both dams and granddams with proven genetic excellence—an essential requirement for producing foals that express outstanding Arabian type, charisma, and movement from the very next generation.

The qualities Haras JM seeks are unmistakable: a fluent movement and accentuated attitude. Strong, harmonious topline from withers

to croup. Balanced structure with correct limbs and ideal angulation. Fine, sculpted details—delicate ears, large expressive eyes, refined muzzles and nostrils. Throats and jaws in perfect proportion to the increasingly refined head type that defines today's champions.

These markers define the selected mares for the Haras JM breeding program. The ability of each dam to

\*SL White Lace (Strike x Four Winds Flare by Four Winds Flag) - Born in 1988

transmit these qualities to her foals is a central focus of the farm's selection process—ensuring that every new generation carries the potential to excel.

With each foal born at Haras JM, the team reaffirms its commitment—not just to aesthetic refinement and ideal movement, but to preserving the deeper, intrinsic qualities of the

Arabian horse. As breeders, they view each generation as an opportunity to honor the breed's history while securing its future, continuing an evolution that unfolds steadily, one foal at a time.

This pursuit is more than a professional endeavor. It is a source of deep pride, passion, and inspiration. It motivates everyone involved to aim higher,

dream bigger, and protect the legacy they've worked so hard to build.

The genetic power of Haras JM's herd has already secured the farm's place among Brazil's most respected breeding programs. And with unwavering focus and dedication, Haras JM continues to earn recognition on the international stage—where its horses speak for themselves.

## Brazil's Leading Halter Arabian Horse Breeder

Haras JM has claimed the prestigious title of Brazil's Best Arabian Halter Horse Breeder twelve times. With a 35-year legacy in breeding and a consistent presence at the top, Haras JM stands out as one of the most influential forces in the Brazilian Arabian horse community. Since the founding of ABCCA 60 years ago,

few breeders have matched such a sustained level of excellence.

The farm has earned multiple awards as Brazil's Best Performance Horse Breeder, highlighting its versatility and commitment to producing outstanding horses across disciplines. Haras JM takes great

pride in contributing to the strength and relevance of Brazilian breeding, playing a key role in positioning the country among the top three nations in the world for Arabian horse quality—an achievement built over more than four decades by the dedication of Brazilian breeders.

## JM Aristocrats and Stars: The Story of Champion Bloodlines

Breeding success is not a matter of chance; it stems from in-depth knowledge, long-term vision, daily commitment, and a keen understanding of genetics.

At Haras JM, the journey began with over 20 years of experience in

breeding various animal species, which included learning about the significance of dam lines and the enduring genetic influence of mares in every generation.

In August 1989, shortly after acquiring their first two Arabian horses, the

family behind Haras JM committed themselves to build a breeding program that would place them among the top ten Arabian horse breeders in Brazil. It was an ambitious goal that demanded both patience and strategic investment.

## Captivating Beauty, Impressive Genetics

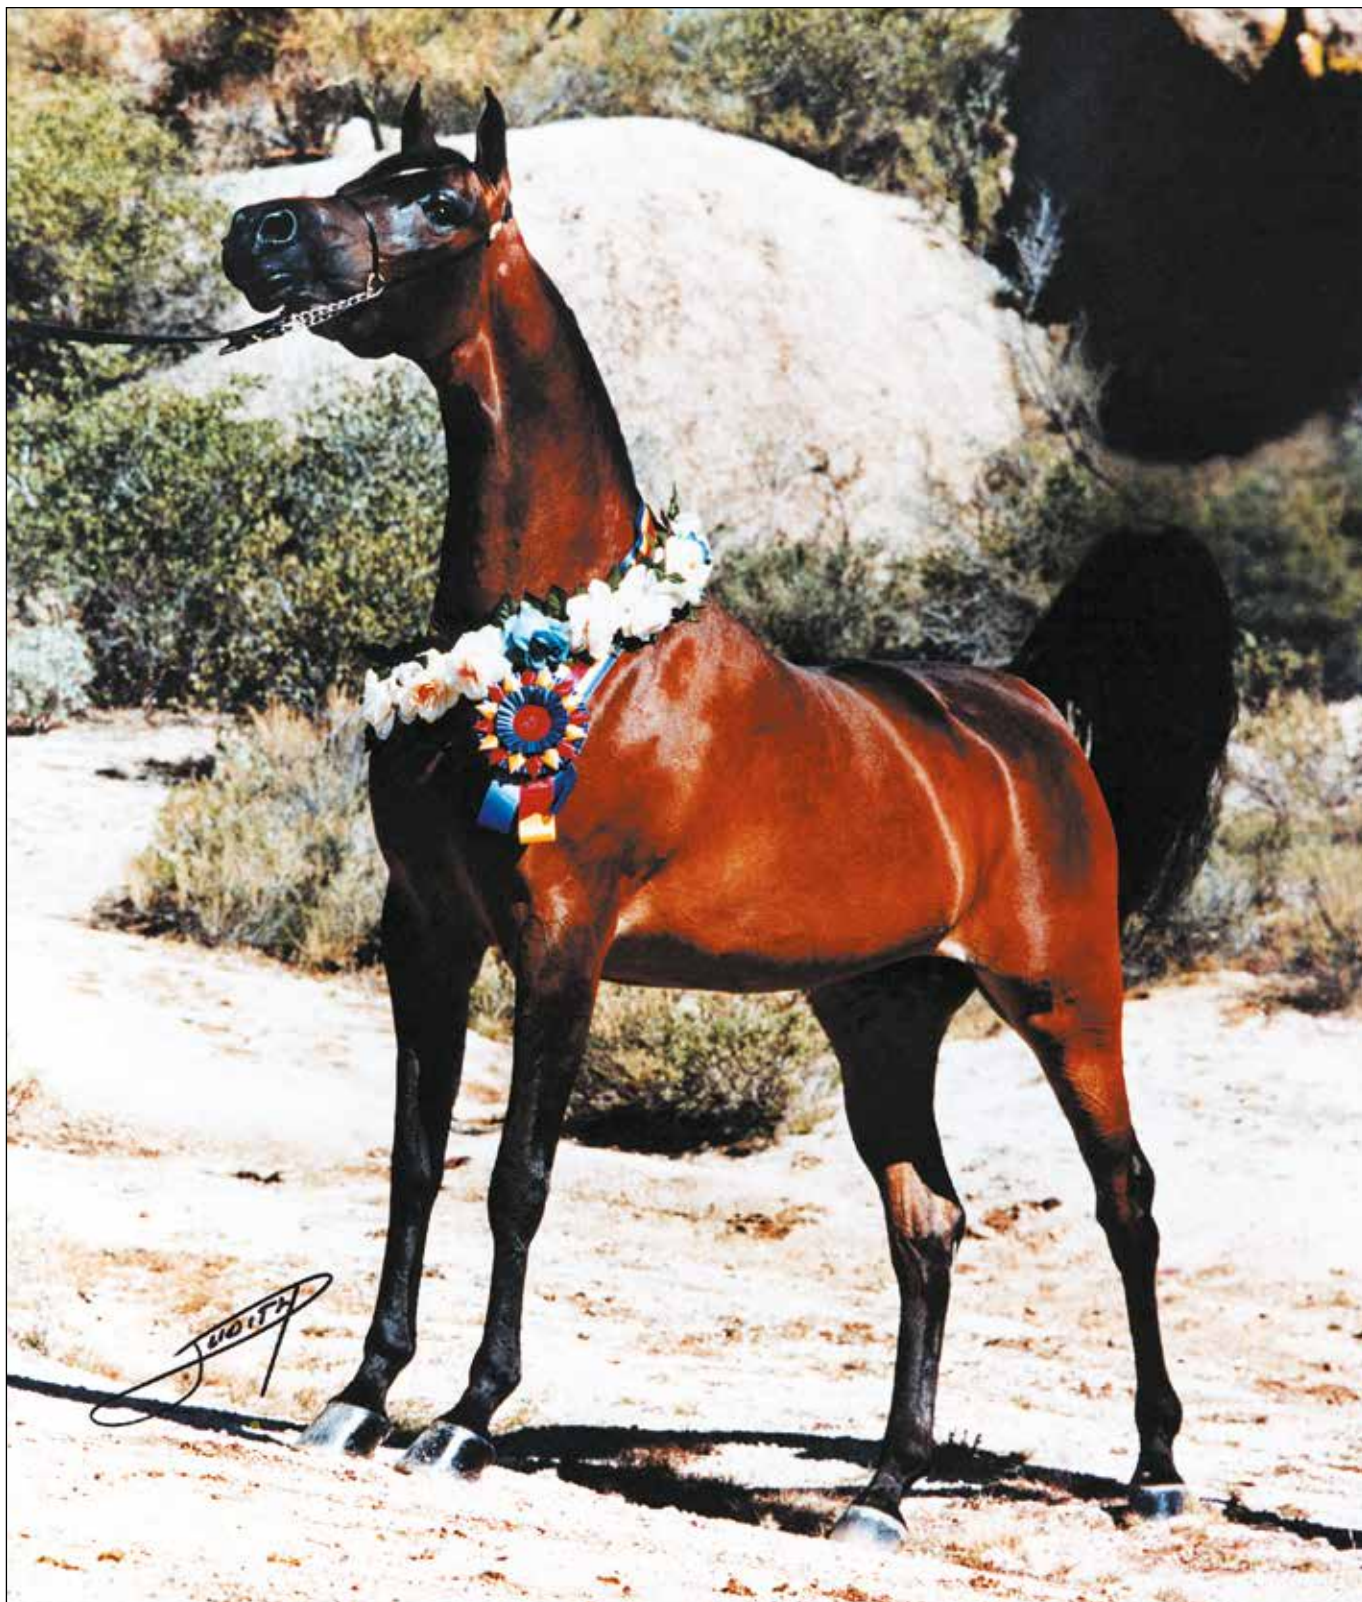

Guided by their esteemed friend and breeder Luciano Cury, Haras JM initiated the importation of select mares from the United States, long considered the source of premier Arabian bloodlines. This initial group featured notable mares such as GAY SHAH ROSE, SOLAR FLAIR, BURGANDY BEY, and FANTASIA CASTANA.

During this first acquisition of mares, they could not finalize the purchase of a striking black daughter of STRIKE. Consequently, they requested that Luciano Cury seek out another STRIKE daughter of comparable quality. He subsequently presented them with SL WHITE LACE, who would become the dam of their first farm-bred superstar, EUROPA

EL JAMAAL, a National Champion in Brazil, the United States, Canada, and Saudi Arabia.

From 1997 onward, SL WHITE LACE and EUROPA EL JAMAAL brought international recognition to Haras JM, attracting breeders from across the globe.

Cadadense National Champion 1997 - USA National Champion 1997

## From Selection to Success: The Pursuit of Excellence

SL WHITE LACE gave the farm three more daughters: FANTASTKA JM, GODIWA JM, and JARYTZA DI STYLE JM. Tragically, SL WHITE LACE passed away shortly after her subsequent foaling. This circumstance led JM to favor embryo transfer for their superstars' reproduction, significantly reducing the risks of premature death.

While GODIWA JM was part of the herd for several years, JARYTZA DI STYLE JM—born in 1999—still resides at the farm. She shares this senior status with HESTORIAH JM, born in 1997. Both mares are thriving at JM, enjoying their nearly 30 years of exceptional care and attention for their invaluable contributions to the HARAS JM breeding program.

These two mares exemplify the astute selection of females that underpins the success of the HARAS JM breeding program. Their guiding principle is to retain significant daughters, granddaughters, and great-granddaughters of their superstars within the JM herd, with a particular focus on the progeny of SL WHITE LACE, HESTORIAH JM, GAY SHAH ROSE, FANTASIA CASTANA, and GODIWA JM.

In recent years, Haras JM has also made its mark as a producer of exceptional stallions—bred, born, and raised at home—who are now

proving their value as sires. These achievements bring them immense joy and reinforce their belief that the JM breeding program has reached a highly significant level of excellence. Among their JM-bred stallions are YPARADISE JM, BALLACK VITORIO JM, CASH DEL TINO JM, CALVIN DEL TINO JM, EL KAIZER ALI JM, FIRENZE YPARADISE JM, and they hold great promise for their young stallions commencing stud duties in 2025. The stallion FIRENZE YPARADISE JM is a grandson of HESTORIAH JM, and his first foals, born in 2025, are remarkably refined and highly promising colts and fillies. EL KAIZER ALI JM, son of VENITTIA Di PSCORE JM, is also consistently passing on exceptional refinement.

HARAS JM holds a prominent position among the elite Brazilian Arabian horse matriarchs, according to the ABCCA ranking. They proudly possess a significant number of Aristocrats among the top broodmares in Brazilian breeding. HARAS JM boasts eight mares who have produced winning offspring in the Brazilian National statistics, including their Aristocrats GODIWA JM, HESTORIAH JM, JARYTZA DI STYLE JM, XAKLYNNA D'PSCORE JM, as well as the mares they acquired to maintain their leading edge through their progeny born within the JM breeding program: MC VITORIA, ALYSSA CRYSTAL RLC, MARJORIE HVP,

and the fantastic STIG JUSTHINE.

Year after year, Haras JM continues to enrich its herd with influential Arabian mares. This dedication is crucial for the exceptional quality and consistency of the JM breeding program's genetics.

The farm has made significant investments to produce elite-level foals and to acquire broodmares of the highest standard. One of its most prized additions is WIEZA'S DIAMOND ORA, a two-time U.S. National Champion and the only mare in American Nationals history to earn two Junior Mare titles.

Her impact on the farm's breeding vision is so profound that Haras JM also brought in her sire, the champion SUPREME JUSTICE ORA, along with three of her sisters: WIEZA JEWEL ORA, WIEZA SUPREMA ORA, and KWIEZA SHARIF JM.

WIEZA'S DIAMOND ORA represents the sixth consecutive generation of U.S. National Champion mares in her lineage—an extraordinary legacy that now enhances the JM program.

The following pages showcase a selection of mares that form the foundation of Haras JM's genetic strength, along with standout fillies, colts, and stallions proudly bearing the JM prefix.

## GENETICS - CONSTANT EVOLUTION

### A Legacy That Crosses Borders

The strength of any breeding program lies primarily in the quality of its mares. A glance at the most successful show farms reveals one common thread: exceptional broodmares who define the quality of their contenders in the most prestigious competitions.

At Haras JM, they select each mare meticulously for her inherent potential to produce show-winning colts and fillies. Experience has shown that not all offspring of an excellent mare will have the superior qualities needed for success in the arena.

Many mares that may not themselves

be competitive have proven to be highly successful in producing champion contenders. These observations have blessed them with the birth of exceptionally competitive and victorious individuals.

Their objectives for both the mares born at JM and those acquired from other breeders are consistent with the guidelines established for the Haras. The farm's approach is clear: not all broodmares must be show champions themselves. Some of the most valuable mares are those that pass on traits shaping the next generations—foals with the structure,

elegance, and potential to excel in both competition and the elite stud farms of the world's most discerning breeders.

The genetic excellence of the Haras JM mares knows no geographical boundaries. Colts and fillies born at JM have already crossed seas and continents, captivating breeders and Arabian enthusiasts in various countries. Whether in halter, performance, or the elite breeding market, the quality of JM mares is committed to honoring the BRAZILIAN legacy as the third-best breeding nation in the world.

### The DNA of Champions

In breeding, genetics plays a crucial role. They are the blueprint for the future of any breeding program. The mares of Haras JM embody

the phenotype, attitude, beauty, balance, and pedigree that reflect current global standards and anticipate the trends seen in show

rings across Brazil, South America, North America, and other regions where Arabian horses are highly esteemed.

Godiwa JM (Kaaly JP (The Minstril) x SL White Lace (Strike x Aladdinn) - Born in 1996

Cancione Del Tino JM ('El Tino x Xaklinna D'Pscore JM) - Born in 2017

Haras JM warmly invites breeders from around the world to visit and experience their mares in Brazil. They are confident that visitors will receive a warm welcome and will have the opportunity to admire a wide selection of exceptionally high-quality mares, stallions, and foals.

For 35 years, they have been committed to achieving their high standards of quality. This dedication has created a legacy that ensures Haras JM will continue to excel in the show ring and the breeding programs of fellow enthusiasts. Like them, these individuals invest in enhancing and strengthening the genetic power of their broodmare bands.
