UMBRIA

THE GREEN HEART OF ITALY

In the shadow of Montone, a beautiful Italian village in the Northern part of UMBRIA, a region referred to as “The Green Heart of Italy”, we find the home given to a large number of Arabian horses from all around the globe.

A Home, where relationships are founded on trust and professionalism

A Home, where the Arabian horses get the love and care they deserve

A Home, where memories are created

A Home, we named Capecci Arabian training center ...

Capecci Arabian Training Center has grown with great success within the world of Arabian horses internationally. No surprise with one of the most respected, favorite couples leading the center. Susi & Paolo Capecci have followed their dreams standing side by side through all the moments and stages of their journey.

Some of the world's most memorable Arabians have competed and been presented by Paolo Capecci, a true horseman who has captured several titles over the years. Susi Gurschler Capecci has been around Arabian horses practically all her life. Walking in her father's footsteps, she has been gifted with a special 'Eye' for a horse. Her knowledge of and experience with the Arabian horse make her the right person for a professional environment such as Capecci Training Center.

Giampaolo Gubbiotti, better known as Woody, was

greatly involved in the growth of the Training Center. No less than any other does he share the love for these beautiful creatures. Over these last years Woody has focused on promotional activities and public relations. The management and team have turned effective cooperation and creative thinking.

The organizational structure of Capecci facilities makes it possible to offer the best training programs and also the highest quality services when it comes to Arabian breeding due to their highly experienced staff.

They say 'Never change a winning team' and so they stick together.

When there is teamwork and collaboration wonderful things can be achieved.

The Training Center is a facility completing all Equestrian needs. The training center creates personalized, relevant programs for each horse.

With an instinct and sensitivity for Arabian horses and more than 20 years experience in breeding, Capecci IATC is about to take the breeding station beyond expectations. With an additional complex still under construction, the training center will be able to offer a total of 65 stables for breeding. The facility provides the broodmares with 18 hectares of pasture. The breeding facility is separate from the training facility to ensure the broodmares, stallions and young stock have a peaceful surrounding away from the daily training activities.

The breeding services offered in collaboration and with great gratitude to their highly experienced veterinarian Dr. Andrea Del Sero contain: artificial insemination, embryo-transfer, infertility investigation, detecting and managing equine infertility problems and, last but not least, to give an appropriate program for pregnant mares and foaling. Dedication and hard work has resulted into

a high success rate in mare pregnancy. During the foaling period, mares are stabled in boxes containing observation cameras and foal alert systems for all mares close to their foaling date. This way the staff are able to closely observe the mares and provide help when it is needed.

The Training Center can simplify breeding for you with assistance from some of the best fertility experts in Italy. Stallions are provided with the best care, keeping them in top shape to make sure the quality of semen is at its highest. Capecci IATC offers several breeding services for stallions: managing the stallion, promotion, breeding potential examination, phantom training, semen collection and evaluation, processing of cooled semen shipment and semen freezing, storage and distribution. The wide range of services offered by the center can meet most demands of Arabian horse owners both for Training & Breeding.

On behalf of Capecci Training Center, we are delighted to extend to you a warm welcome!
