*The inspiration of the Past to shape the future*

## The Past...

*Experience shows that new breeders who do not have a background in horse breeding show great interest in the beginning, the discovery phase, the first purchases and the first products. Here comes a distinguished individual, a good placement in an important show, a good sale and everything helps to keep the enthusiasm going for several years. That's what happened in 1991 to Thiago Pontes, then 14 years old, when his father decided to buy some Arabian horses for the recently acquired rural property Haras Wanu, in the city of Porto Feliz, in the State of São Paulo, Paulo, Brazil. The mares chosen for this first foal crop were daughters of El Shaklan, Hal Gibby, Prichal, Muscat and AN Malik. The farm quickly creates its first outstanding product, the beautiful HW Egyptian Art (El Shaklan x Hal Sheeha NA, by Hal Gibby), which became Brazilian National Reserve Champion Mare, was exported to the United States and later taken to the United Arab Emirates, where she is well known. Two other examples of successful animals that won on the shows are the Brazilian National Reserve Champion Mare NNL Scandal Nashana (Khadraj NA x Jur Natasha by AF Festival), exported to the United States, and Dyorchall HCF (Don El Chall x Dyorah HCF by NV Sure Fire), Brazilian National Champion Stallion, sold to Europe.*

*(El Shaklan x Hal Sheeha NA, by Hal Gibby)*

*“The farm quickly creates It’s first outstanding product, the beautiful HW EGYPTIAN ART (\*El Shaklan x Hal Sheeha NA by \*Hal Gibby) which became Brazilian National Reserve Champion Mare...”*

## The Present...

After that exciting start of five years, Thiago, his father and his two brothers decided to follow different paths, momentarily leaving the breeding of Arabs aside. After completing his studies graduating in Business Administration, Thiago married Kamilla in 2001 and dedicated himself to his work in international trade without ever having abandoned the idea of one day returning to have again his own horses. "I had a relatively long period of time, more than 20 years until I restarted, but I never let go of the certainty that one day I would return" says Thiago. "And now sharing the pleasure of raising with my wife and our two sons, Nicholas and Matheus." The return took place in 2020, taking advantage of the fact that excellent mares were available on the market. The first choice was typey Valentina HBNS, a beautiful grey that confirmed once and for all that the breeding program was re-established, now under the name of TP Arabians. Valentina is a granddaughter of FA El Shawan, through her father Pantheon MENS, who ended up being bought too, as this lineage has achieved great results all over the world. "In addition to FA El Shawan, who is present in most of the current group of horses, I really like the blood of Ali Jamaal, El Shaklan, El Jahez WH, Marwan Al Shaqab, RFI Maktub, WH Justice, Shael Dream Desert, among others", completes Thiago.

*The new facility opened in early 2023 and is located at distance of 40 minutes by car from the Brazilian Nationals show grounds or only 90 minutes from São Paulo city.*

*Ah*

## The Future...

*In addition to Pantheon, two other sires were chosen for these first generations: the grey Jytan Meia Lua (El Jahez WH x Jyvara El Maktub by RFI Maktub), one of the last colts bred by late Lenita Perroy, and for the future the 2022 Scottsdale Yearling Champion Maximillion NA (Dominic M x Makala NA by Ever After NA), bred by North Arabians and acquired prior to this achievement. Jytan already has the first products born on the farm, in addition to others bred outside it, that even won titles at the last Brazilian Nationals. Imported frozen semen are also being used. "Today our group is formed by 25 mares. I selected what we can call an international type to produce individuals with great demand in all current markets on different continents", explains Pontes. "Although the breeding program is entirely aimed at family leisure – having the animals and living with them without worrying about the market – we have to keep within that number, seeking to produce the highest quality possible and make it accessible to other breeders and friends.*
